

The Introduction of Safety Confirmation System 'ANPIC'

Toyama Prefectural University has introduced the safety confirmation system 'ANPIC' to confirm the students' and staffs' safety promptly and surely in the event of a large-scale disaster.

In emergency cases (for example, when an earthquake with a seismic intensity of 6 or greater occurs in Toyama Pref.), ANPIC sends out safety confirmation emails automatically to the accounts which have been registered in advance. And receivers of the emails can report each of their safety status, such as, if they are fine or not, where they are, or can send some message with their own terminal in a simple way.

The system administrator will send out safety inquiry emails manually, in case that a large-scale disaster other than earthquake would occur and in case of disaster drills.

■ How to register

1. Please access **【ANPIC Initial Setup Procedure】**on university website
2. For Smartphone users please see **【ANPIC Simple Operation Guide: Smartphone】** on our homepage site. In case you need to use App or LINE, please see above for the detail.
3. We will plan a disaster drill in the future, so please confirm how to report your safety status by using the system in advance. Please see the below.
【ANPIC Simple Operation Guide: Smartphone】
【ANPIC Simple Operation Guide: Web/Feature phone】
4. If you have some setting to reject spam mails, please make sure that emails from “no-reply@jecc.jp” can reach you.

© Please contact to the office if you have any questions about ANPIC.
